

"OLA Saved Me" to the tune of "On the Way Down" by Ryan Cabrera

Days and nights of this work
There are so many errors
Typing more and more lines, getting nowhere
Fearing carpal tunnel
No direction I took a walk, and

On the way down, Laptop with me, I walked through the forest,
All the way to LSRC
On the way down
I almost declared English but
I came to see you

An exception here
Null pointer error
Can there ever be a method that is correct?
There's OLA, he can lead the way!
I compileand yeah, it's running! 'cause

On the way down, I saw you, and you saved me from Huffman
And I won't forget the way you helped me
And on the way down
I almost saw Dean Sue, but
I ran to ask you

I was so afraid of going under
But now, the size of the Tree feels like nothing
No nothing

Type type type, help's all I wanted
Run run run, OLA's all I needed
Submit Submit Submit! Help's all I needed, OLA's all i needed!

I won't forget the way he helped me!
All that I wanted, all that I needed now.

Oh, on the way down, I saw you and you saved me from an F
and I came to say that "I'm a whiner"
On the way down
I almost trashed my laptop, but
I came to see you.
