What we will do today

- Chapter 4 Sec 2 – Parameters
- New partners today
- Classwork

Overview

- The need for more flexible methods
- Creating methods with parameters
- Passing arguments to methods
- Demo
  - Using Alice – methods with parameters
A Beetle Band

• Create an animation for a bug band as an ad for their next concert
• Each band member will perform a short solo

Storyboards

• Each bug member will perform a solo

Code for georgeBeetle

• We will need four versions of the code, one for each band member
• This code will only work for georgeBeetle

A Better Solution

• Four versions of similar code is tedious.
• The things that change are
  – The beetle
  – The music the beetle plays

• Better Solution: write a more flexible method
Parameters

• Built-in methods provide **flexibility** by providing parameters such as distance and duration
• Parameters allow you to pass in values
  – The values are **arguments**
• Example:

```
georgeBeetle  move up  0.5 meters  duration = 0.5 seconds  move...
```

Parameters: distance, duration
Arguments: 0.5 meters, 0.5 seconds

Types of Parameters

• Alice provides several types of parameters that can be used in your methods.

The Storyboard

• Write one method and use parameters for
  – Which bandmember to perform
  – Which music to play

Solo:
Parameters: **bandMember**, **music**
Do together
Do in order
  * bandMember move up
  * bandMember move down
play **music**

Creating a Method Named Solo

• Can be used for any band member
• Will need
  – An Object parameter – which band member is to play a solo
  – A Sound parameter – which music should be played
World.solo with parameters

• Note that in each call, arguments must be given for both parameters

A Number Parameter

• Add a number parameter for **height** the **bandMember** jumps up and down

Classwork Today

• Create worlds
  – Beetle band duet
  – Magic Act
