- Today – APTs with Sets and ArrayList
- Extra credit with today’s classwork
  - Due April 5
- Next class – review for exam 2
  - Go over old exams
  - No Reading Quiz for next time

Collections: ArrayList vs Set

- ArrayList
  - directly access an item
  - keep items ordered
  - Can have duplicates of items
  - What are operations on an ArrayList?

- Sets
  - Keeps items unordered
  - No duplicate items
  - Easily remove duplicates
  - What are operations on a Set?

Using Both ArrayList and Sets

- You may want to use a set to get rid of duplicates, then put the items in an ArrayList and sort them!
