Mid-Point Critique

1. Are you keeping up with your timeline? Is your project in the place it’s supposed to be?

2. Do you think, looking at your timeline, that you will be able to complete your project without using time outside of class?

3. Do you feel comfortable with using Alice?

4. Is there something you would like to put into your world that you don’t know how to do? What would you like to add?

5. Are you having any problems with your project (or with using Alice)? Do you have any other questions that you can think of?
