Teacher: Phyllis King  
Subject: CSA KEYBOARDING

I can Identify the parts and uses of a computer?

I can explain the elements of the computer hardware system?

Indicator(s):

The use of a formative assessment will show students level of comprehension.

Using an exit slip (graphic Organizer) I will measure students understanding also oral questioning

The Learner will be able to:

<table>
<thead>
<tr>
<th>Essential Question</th>
<th>Identify the part of a computer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is it possible for a computer to communicate with a human, if yes what are these devices?</td>
<td></td>
</tr>
</tbody>
</table>

Technology Standard: 7.5.1 Evaluate information resources based on specified criteria.

Strategies/Sequence of Instruction:

Engage:

Students will use prior knowledge of a computer to describe the components of a computer system.

Explore:

Using MS Digital Literacy Course students will discover the components of a computer

Explain:

The students will share their ideas and discoveries with the class.

Elaborate:

http://www.gcflearnfree.org/computerbasics students will discover more Ideas and fact about the internet from this site.

Evaluate:

Students will look at various types of computers and compare the different uses of the input, output, and storage devices

Writing Component:

Students will write a brief understand of how we communicate with computers and computers communicate with us.

Assessment:

Review using the ALICE GAME Computer Parts and then take the quiz.

Resources:

21st Century Themes: Financial, Economic, Business and Entrepreneurial Literacy  
21st Century Skills: ICT (Information, Communications and Technology) Literacy

Reflection:
