The Maze Runner

**Developer:** Audrey Toney

**Level:** Maze Runner is a demo interactive challenge game that can be used for any content area at most any grade level.

**Description:**
This world is designed for interactive review of content concepts. In this demo, the player answers math questions at the high school level. Questions are generated randomly.

In Maze Runner, the player is challenged to navigate a maze that changes over time. To successfully complete the mission, the player must successfully answer “roadblock” questions. The player navigates through the mazes using the left, right, up and down arrow keys on an honor system of navigating in within the lines.
