Subject: Technology / Administration
Topics: Equipment protection; all-round education
Title: How to take care of your (borrowed) laptop

Descriptions: This program is designed to understand and solidify the principles of using a borrowed laptop from the school. To name a few, students shouldn't be eating or drinking next to their computer, nor should they lend the computer to someone else. Students are likely to take heed of the tips and warnings regarding protection of their equipment through this animated program.
