## Global SDN Market Is Business Opportunities and Forecasts 2019 – 2026 | With Key Players Analysis On Cisco Systems, Inc., VMware, Inc., Huawei Technologies Co. Ltd., Ciena Corporation

---

🕒 September 23, 2019    👤 Databridgemarketresearch

Global SDN Market is expected to rise from its initial estimated value of USD 8.92 billion in 2018 to an estimated value of USD 67.98 billion by 2026, registering a CAGR of 28.90% in the forecast period of 2019-2026.

Google

A close-up photograph of a person's face, focusing on the mouth and nose. The person's right index finger is pressed against their lips in a universal gesture for silence or secrecy. A large, red, rectangular stamp with a distressed, ink-like texture is superimposed over the lower half of the face. The stamp contains the word "CONFIDENTIAL" in a bold, serif, all-caps font. The background is solid black, which makes the person's skin and the red stamp stand out prominently.

**CONFIDENTIAL**

# Evaluation

## Mozart Overhead

- Sublinear
- **1.58%** to latency

More results can be found in the paper

# Conclusion

- SDN controllers are **ill-equipped** with poor primitives for supporting SDNApps and abstractions for enabling SDNEnhancements.

- Mozart interface allows for a **systematic** and **principled** inclusion of SDNEnhancements into the SDN ecosystem.

**Thanks for your attentions!**
