Composite Pattern: Expressions

- Leaf and non-Leaf (part/whole) have same interface
  - Treat whole like part
  - How are parts added to a whole?
  - Simple interface, control propagates through system

- Expression and BinaryExp are abstract base classes
  - What makes a class abstract?
  - Why are abstract classes designed?

- How is a BinaryExp class evaluated?
  - What about a Constant? Variable?
RSG Composite

- What’s in a Production?
- What’s in a Definition?
- What’s in a Nonterminal?
