• No reading or RQ for next time
• Apt-three due Thursday

• Today
  – More on appts
  – More on parameters

Passing parameters to functions

• Parameter:  in definition
• Argument:  in use
• Questions:
  – What if the name of the parameter is same as the name of the argument?
  – What happens to a variable when it is sent to a function? After the call to the function?

Mutable/immutable

• Mutable
  – Lists, sets
• Immutable
  – Numbers, strings, tuples

• What happens to mutable and immutable objects when you pass them as arguments?
• How does one change the value of a number/string/tuple by using a function?
• Classwork!
