APT Pancake:  

• How do you solve this problem?
  – First steps: are there simple cases that can be solved immediately?
    • What are these for the pancake problem?
  – Sometimes it helps to know if you are on track, should you use Python to check your paper and pencil work?
• Get specific, solve for 5, not N
  – Fix one parameter, vary the other
  – Identify the cases and continue
Problem Solving to Code

7 Step Process

1. Work small example by hand
2. Write down what you did in words (algorithm)
3. Find Patterns (generalize algorithm)
4. Work another example by hand (does your algorithm work? If not, go back to 2)
5. Translate to code
6. Test several cases
7. Debug failed test cases
Pancake Problem

- Work through the 7 step process....
Three pancakes in a two-cake pan...

- Number of cakes in the system
  - First 5 minutes

- Number of cakes in the system
  - Second 5 minutes
